

COVID-19 TESTING

Accessible. Fast. Easy.

CIC Health facilitates fast, reliable testing at the lowest possible cost for safer summer camps.

We are one of the largest COVID-19 testing services providers in the country, having facilitated more than **1.5 million tests**, largely in youth settings, including 600+ schools and 160K+ students, teachers, and staff. Our flexible camp testing solutions can be tailored for pre-arrival, arrival, and ongoing surveillance testing — whatever your camp needs to open safely and efficiently — and stay open.

Our founding collaborating lab, the Broad Institute of MIT and Harvard is one of the best in the industry and has conducted **1 of every 30 COVID-19 tests** in the US. Results are returned within an average of **24 hours** — often much faster — for the gold-standard PCR test, including individual and pooled options.

How it Works

-  Connect with one of our account managers
-  Receive software training and guided setup
-  Collect samples and send for processing
-  Access your results securely online

Pooled PCR testing as low as
\$6 per person

Individual PCR testing
\$42 - \$62 per person
(mail-in options also available)

Results in ~24 hours
often much faster
